EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in Applicant's Remarks filed 9/3/2008.

The application has been amended as follows:

20. (Currently Amended) The method of claim ~~[[20]]~~ 19, wherein at least one of the one or more sources comprises an investigation firm.

33. (Currently Amended) Computer executable program code residing on a computer-readable ~~[[30]]~~ medium, the program code comprising instructions for causing the computer to:

indicate in a computer system that an entity is a construction industry entity according to the entity's engagement in at least one of: design, building, manufacture, repair and maintenance, of one or more man made structures; gather data into the computer system generally related to one or more construction industry entities; receive data into the computer system descriptive of details of a financial transaction involving a construction industry entity,

Art Unit: 3694

wherein the data received comprises identification data for at least one construction industry entity;

structure the gathered data and the data relating details of the financial transaction according to risk quotient criteria;

calculate a risk quotient by referencing the structured data, wherein calculating the risk quotient criteria comprises a value determined by the steps of: associating a numerical weight with each of a plurality of reputational risk variables;

associating one or more of the reputational risk variables with the data descriptive of details of a financial transaction;

determining a numerical value based upon the content of the data descriptive of details of a financial transaction associated with the one or more reputational risk variables; and

multiplying the numerical value based upon the content times the numerical weight associated with each of the reputational risk variables associated with the data descriptive of details of a financial transaction; and generate a report comprising the risk quotient and at least some of the structured data referenced to calculate the risk quotient.

Authorization for this examiner's amendment was given in a telephone interview with Randolph Calhoun on 12/9/2008. The application has been amended as follows:

1. (Currently Amended) A computer-implemented method for managing risk related to a construction industry, the method comprising:

indicating in a computer system that an entity is a construction industry entity according to the entity's engagement in at least one of: design, building, manufacture, repair and maintenance, of one or more man made structures;

gathering data into the computer system generally related to one or more construction industry entities;

receiving data into the computer system descriptive of details of a financial transaction involving a construction industry entity, wherein the data received comprises identification data for at least one construction industry entity;

structuring the gathered data and the data relating details of the financial transaction according to risk quotient criteria;

calculating in the computer system a risk quotient by referencing the structured data, wherein calculating the risk quotient criteria comprises a value determined by the steps of:

associating a numerical weight with each of a plurality of reputational risk variables;

associating one or more of the reputational risk variables with the data descriptive of details of a financial transaction;

determining a numerical value based upon the content of the data descriptive of details of a financial transaction associated with the one or more reputational risk variables; and

Art Unit: 3694

multiplying the numerical value based upon the content times the numerical weight associated with each of the reputational risk variables associated with the data descriptive of details of a financial transaction; and

generating a report comprising the risk quotient and at least some of the structured data referenced to calculate the risk quotient.

DETAILED ACTION

Allowable Subject Matter

Claims 1-4, 6-10 and 12-33 are allowable. The restriction requirement, as set forth in the Office action mailed on 2/22/2008, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claims 23, and 27-29, are no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim. However, claims 34-38, directed to a non-elected embodiment, remain withdrawn from consideration because they do not require all the limitations of an allowable claim.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

This application is in condition for allowance except for the presence of claims 34-38 directed to a non-elected embodiment without traverse. Accordingly, claims 34-38 have been cancelled.

The following is an examiner's statement of reasons for allowance:

Independent claims 1, 32, and 33 recite features directed the particular calculation of a risk quotient in the context of evaluating a construction industry financial transaction. The closest patent art of record, US Patent 5,680,305 to Apgar, teaches the evaluation of real estate, but fails to teach the particular risk quotient calculation claimed by Applicant.

The closest Non-patent literature is Anthony Mills article "A systematic approach to risk management for construction", published in Str4uctural Survey, vol 19, number 5, pg 245, 2001. It generally teaches risk management in the construction industry, but fails to teach the particular calculation of Applicant's claimed invention.

As such, Applicant's claimed invention is not taught, suggested, or rendered obvious by the art of record, either alone or in combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to BRIAN FERTIG whose telephone number is (571)270-5131. The examiner can normally be reached on Monday - Friday 8:30am to 5:00pm EST. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Trammell can be reached on (571) 272-6712. The fax phone
